BodyGuard

BodyGuard, bought to you by Hydrosan Pty.Ltd., could be the answer to your family's health concerns!

BodyGuard is a powerful personal protector that harnesses the oxidising power of pure oxygen, and assists in the control of bacteria, virus, fungus etc. BodyGuard works by releasing this oxygen against harmful bacteria etc.

BodyGuard is safe to spray on your skin, eyes, hair and food! Unlike many 'toxic' products available, BodyGuard simply breaks down to pure oxygen and pure water.

BodyGuard is a revolutionary breakthrough – 100% effective AND 100% environmentally friendly. BodyGuard's active constituents are oxygen at 1200ppm and silver at 10ppm.

This outstanding product, developed and made in Western Australia, has shown itself safe and effective when sprayed on acne, cold sores, cuts, burns, insect bites and stings etc.

BodyGuard has also been successfully used to alleviate the symptoms of Athletes Foot, Tinea, Dermatitis and Conjunctivitis.

The following is a sample of the many and varied success stories from satisfied BodyGuard customers.

Acne

My son started to get the dreaded teenage acne on his cheeks. After using another product without much success, I was told to try BodyGuard. The results were fantastic. My son's skin is greatly improved – thank you very much

Athletes Foot

12th July 2003

Hello,

I have recently used a bottle of BodyGuard spray on my feet to see if it would cure the athletes' foot, I have had for several years from constant training in shoes.

I had tried many remedies, both natural and pharmaceutical, but none of them worked for any period of time. Until I tried your BodyGuard! I sprayed thoroughly every day (2-3 times) and let it dry completely. After a week or two, I found that my athletes' foot had completely cleared up. I continued for another week then stopped to see what would happen – to my delight it did not reappear.

Before BodyGuard, I could not wear high heels or open sandals, but now I can feel confident.

Thank you for a wonderful product.

Cold Sores

I had a cold sore on my top lip I came to Lester on Sunday the 20 of July 2003 and asked for a bottle of BodyGuard to see if it really does what he says it will. I sprayed my lip several times that day and I continued to do it for the next two days and within those three days of using the BodyGuard my lip was no longer swollen and the cold sore was virtually non existence. It was heaps better than cold sore cream because you cannot see Body Guard and it has no taste, which is great as well. Cold sore cream you can see and are conscious of it plus it has a bad taste to it. It also cleared up the pimples I had under my chin. I had dermatitis on my wrist caused from my watch being worn non-stop in the shower and the beach it became infected and was rather itchy and kept getting worse I started to spray BodyGuard on my wrist all day at work and by the end of the working day it was virtually gone

Conjunctivitis

I have suffered with chronic and recurring conjunctivitis for many years.

I still find it hard to believe that spraying my eyes with your BodyGuard completely cleared it up AND it has not returned.

Thanks for an outstanding product.

Eye Cyst/Post Operative Infection

5th May 2004

My dog, a Shitzu, developed a corneal cyst in her eye. After two courses of antibiotics and eye drops and cream from the Vet, the eye was still not clearing.

The Vet wanted to try a third course of antibiotics, then a friend told me about Liquid Life Colloidal Silver. I started her on 20ml twice a day in conjunction with spraying BodyGuard into her eyes. Within two weeks, the eye was clear and a visit to the Vet confirmed that the cyst had completely gone.

She also had an infected scar line – the result of an emergency hysterectomy after having pups. The BodyGuard cleared up the scar line within a week and the infection cleared as well.

I now regularly use the silver to wash her eyes and keep them clear as these small dogs are prone to eye problems.

Flu, Colds and Coughs

18th July 2003

Dear Sir,

I wish to bring to your attention, my appreciation of one of your products BodyGuard. I have been using it for approximately 3 months now and have gone from being a person very susceptible to colds and flu to someone who has not had so much as a sniffle.

Since I started using BodyGuard, myself and my family (who are all involved in retail and training industries

where colds are endemic) have not lost a single days work. I spray BodyGuard under my tongue prior to and after the day's activities, it works. It is also excellent for use on boils and conjunctivitis.

I wish to congratulate Hydrosan for BodyGuard and wish the team all the success they deserve.

Mouth Ulcer

13th April 2004

To whom it may concern

I wish to bring to your attention, my appreciation of the effectiveness of one of your products BodyGuard.

I have been using BodyGuard for at least 3 months. I have even used it on a mouth ulcer and it worked.

Keep up the good work.

Yours in Health

M Simpson

Rash

Sometimes at night, the scratching would be so bad, that there was not much hope of sleep for more than a couple of hours.

I tried the BodyGuard one night, and to my amazement, the desire to scratch just vanished.

It has worked every time and rescues me from endless scratching and irritation.

My feet thank you Mr Hydrosan.

Sick Horse

Dear Sir,

I am involved in the horse industry and was given BodyGuard to try by a friend to treat one of my horses that had a persistent skin condition.

After using BodyGuard for a short period, I found that the skin condition was greatly reduced. As a result, I have told fellow industry people about BodyGuard and I

believe that they have become customers.

When you develop other products for horses, I shall want to know. I am now another happy customer.

Thank you

Sunburn

I have just used your BodyGuard to treat my badly sunburnt shoulders after a lovely Australia Day long weekend in the sun. I sprayed several times over a 24-hour period. The relief was almost instant and I did not even peel.

Thanks for saving my very fair skin from blistering and peeling.

Throat infection

18th April 2004

I had a very bad cough, sinus and quantities of phlegm from the nose and throat. After using BodyGuard sprayed under my tongue for only two weeks, the problem cleared up, the throat and nose are much better, and it is easier to breathe.

Wasp Stings

After being stung several times by wasps on my face, I experienced intense pain. I instinctively sprayed my face with BodyGuard and within seconds, all pain had disappeared, leaving no noticeable marks or swelling.

I am very grateful to the manufacturer of BodyGuard. This is another example of the versatility of this product in relation to personal hygiene and protection.

Yours gratefully

White Tail Spider Bite

I am more than happy to state that following a bite on my right forearm from a white tail spider, use of BodyGuard sprayed on 3-4 times a day has completely eliminated all symptoms and the area is fully healed.

11th May 2004

My name is Dee Bunker, and on a recent holiday to Coral Bay, I sustained a bite by a suspected White Tailed Spider. I was placed on double strength antibiotics for 5 days and after three weeks; even though the bite showed no signs of infection it was still very red. I visited HydroSan on the 29th April to purchase some Colloidal Silver to take orally because of the antibiotics and to apply to the bite. I was introduced to BodyGuard and started to spray immediately. For the first 2 days, I sprayed the bite every hour and until 11th, I was spraying approximately every couple of hours. The bite is now almost gone. I also continued to take Colloidal Silver orally. I am ecstatic with the results – no more antibiotics and no scarring!

Reptiles

Rocky Reptiles uses BodyGuard for all our reptiles and for us humans too! It is used to clean enclosures and treat any minor injuries. We have found that it is safe with all reptiles and especially effective when used with the Frogs. We have no hesitation in recommending BodyGuard to all our customers.

Thank you HydroSan for producing such a safe and useful product.
