CellBoost

Colloidal Minerals

‘The spark plugs of life’

Most people are not aware of the importance of minerals and trace elements to their body.

Minerals control the body's ability to absorb and use vitamins. Without these minerals, vitamins have no catalyst and are eliminated from the body.

While we are able to convert foods into vitamins, our bodies are unable to produce or replicate essential minerals.

Combined with today's lifestyles, poor soil conditions and over processed foods; it makes sense to look for an effective, efficient way to give our bodies these vital elements so essential for good health.

Alarmingly, the majority of foods we eat are mineral deficient, most soils no longer carry vital minerals and trace elements - this soil is 'played out'.

This means that even though you may be eating lots of the 'good' foods, you could be literally starving your body.

A single 10ml dose in juice with breakfast each day (or as prescribed by your Healthcare Practitioner) will replenish your body with more than 70 essential organic plant derived minerals and trace elements.

CellBoost is guaranteed to be free of any soil derived or inorganic mineral matter, colours or additives.
